EDUCATION

VIT Bhopal University <i>B.Tech. in Computer Science and Engineering</i>	Sehore, M.P. <i>Expected May 2027 CGPA : 9.26/10.00</i>
Kendriya Vidyalaya No.3 Bhopal <i>Class XII (87.6%)</i>	Bhopal , India <i>May 2022</i>
Kendriya Vidyalaya No.3 Bhopal <i>Class X (92.4%)</i>	Bhopal , India <i>May 2020</i>

TECHNICAL SKILLS

Languages: Java, Python, SQL, JavaScript
Backend: Spring Boot, Spring Data JPA, Node.js, Express.js, REST APIs
Frontend: React.js
Databases: MySQL, MongoDB
Tools: Git, Docker, AWS, Postman, Streamlit, Maven
Core CS: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks

PROJECTS

Job Tracker Application | Java, Spring Boot, MySQL, Docker, REST APIs, JWT, React.js JPA ,Axios

[GitHub](#) | [Live Demo](#)

- Developed a full-stack **Job Tracker** application using **Spring Boot**, **React.js**, and **MySQL** to manage job applications with CRUD operations, search, filtering, sorting, pagination, and status tracking.
- Implemented **JWT-based authentication** with **Spring Security** and **BCrypt password encryption**, enabling secure user registration, login, and role-based access to protected REST APIs.
- Designed a **multi-user architecture** where each authenticated user can securely manage only their own job applications, ensuring data isolation and authorization.
- Containerized the application using **Docker** and deployed the backend on **Render** and frontend on **Vercel**, simplifying deployment and improving portability

Narrative Generation System | Python, LLMs, OpenRouter API, Docker

[GitHub](#) | [Live Demo](#)

- Built a full-stack AI storytelling app with a **React (TypeScript) + Tailwind** frontend deployed on Vercel and a **FastAPI** backend exposing REST endpoints for story generation and state management.
- Designed a **Factory/Strategy-based LLM integration layer** with an abstract provider interface, enabling seamless switching between a live OpenRouter provider and a mock provider for testing.
- Engineered **fault-tolerant API calls** with retry logic, exponential backoff, and multi-model fallback chains to gracefully handle rate limits and provider failures.
- Implemented a stateful, branching narrative engine where reader choices persist across sessions and drive RPG-style progression (custom state variables and inventory).
- Wrote **unit tests (pytest)** covering LLM provider behavior and story-specification generation to ensure core module correctness.

EXPERIENCE

Core Member – Human Resource Team

Data Science Club, VIT Bhopal Sep 2025 – Present

- Conducted candidate screening and coordinated recruitment activities.
- Managed **Neural Nexus**, a university-level Data Science event, collaborating across multiple teams.

ACHIEVEMENTS

- Solved **180+** Data Structures & Algorithms problems on **LeetCode**.
- Maintained a **9.26 CGPA** in Computer Science Engineering.
- Active Core Member of the Data Science Club, VIT Bhopal.

CERTIFICATIONS

- NPTEL – Marketing Analytics (Elite, 97%)**
- NPTEL – Introduction to Machine Learning**
- ServiceNow Virtual Internship Program - SmartBridge**
- Coursera – The Bits and Bytes of Computer Networking**
